

# CrossWind Hollandse Kust Noord Wind project

## Elogen know-how to help build intelligent wind farms

- ✓ Electrolyser of **2.5 MW** able to produce up to 1t of H2 / day at 99.999% purity
- ✓ **Offshore adaptation** and integration into a topside module
- ✓ Part of a “Baseload Power Hub” concept:
  - ✓ *Facility that integrates battery storage and green hydrogen electrolysis production at megawatt scale*
  - ✓ *Energy storage in periods of high-power production*
  - ✓ *Conversion of hydrogen to electricity, via a fuel cell, during periods of lower power production*
- ✓ Located ~20km offshore Netherlands costs
