

Power-to-Power
HyPSTER
project

Elogen technology is positioned on storage, a strategic link in the hydrogen value chain

elogen | Empowering a sustainable world

France

2022

- ✓ Elogen supplies an **innovative 1 MW PEM electrolyser**, to produce 400 kg of green H₂ / day (connection to local renewable energies)
- ✓ HyPSTER, a **large-scale green hydrogen storage demonstrator**, coordinated by Storengy
- ✓ **1st underground green hydrogen storage project in a salt cavity supported by the European Union.**
- ✓ **Storage of green hydrogen in the amount of 2 to 3 tonnes, then up to 44 tonnes**
