

Power-to-Gas

# Lescar/Storengy Methanation project

**Elogen technology  
will contribute to  
transform  
a depollution unit  
into a "biofactory"**

elogen | Empowering a sustainable world

France

2023

- ✓ Elogen will supply a **1 MW PEM electrolyser** (capable of peak operation at 1.3 MW) to the Lescar wastewater treatment site
- ✓ Elogen PEM electrolyser will be used in the **production of synthetic methane** developed by Storengy by means of an **innovative technological process** of catalytic methanation.
- ✓ Third collaboration with the **Storengy** group, the second in the field of **methanation**
- ✓ Elogen's PEM technology offers the advantages sought for the **most innovative projects.**
